

Energy Efficiency Loan Fund

Investing in energy efficient or renewable technology makes sound business and environmental sense.

Invest NI's Energy Efficiency Loan Fund, delivered by the Carbon Trust provides interest free loans from £3,000 up to £400,000, to facilitate an upgrade to your equipment.

Loans are designed so that in most cases the forecast reduction in energy bills will match monthly repayments. On average, loans are paid back in 3 years, after which businesses can enjoy real savings.

How the Loan can help

After taking out a 0% interest loan to help finance a lighting upgrade, Regency Carpets of Bangor has reported energy cost savings of over 67%, and the loan will be fully repaid within 2 years.

“We had a very clear business case to replace our lighting, which delivered both financial and environmental benefits, at the same time as creating a safer, more welcoming work environment. When combined with an interest-free loan from the Carbon Trust then implementing this lighting project became a simple decision.”

Richard Clarke – Accountant,
Regency Carpet Manufacturing Ltd
